4. Status of investment implementation to complete the factory in 2024

Implementing the Board of Directors' policy of cutting costs to make production and business activities more effective, the Executive Board has thoroughly informed the departments, divisions, workshops and each employee in the Company with the motto of holding concurrent positions and performing all tasks related to production activities such as: implementing KPI and 5S programs to all employees of the Company, building the campus, planting trees and flowers to beautify the factory landscape... to cut costs. At the same time, the Company always focuses on labor safety and hygiene, fire prevention and fighting,...

To comply with the provisions of the law, the Company has signed a contract with a consulting unit to reissue the Surface Water Exploitation and Use License and Environmental License.

Due to the impact of storm No. 3 (YAGI), the VH1 road leading to the factory was eroded. To clear the road to the factory, ensure the access to the factory for employees and transport equipment, the Company signed a contract with a design consultant and a construction contractor to build a step road connecting from Provincial Road 154 to the factory.

In addition, the Company continues to develop landscapes, sports areas, creating a green, clean, beautiful, safe and friendly living and working environment for staff, contributing to improving and increasing labor productivity, promoting the spirit of initiative, creativity and enthusiasm in emulation in labor production.

II. Implementation status of Resolutions and Decisions of the General Meeting of Shareholders and Board of Directors in 2024

Based on the Resolutions and Decisions approving the quarterly electricity output plan in 2024 on the basis of the annual plan approved by the General Meeting of Shareholders, the Executive Board has carried out commercial electricity production to optimize the amount of water coming to the reservoir and the electricity market price. In 2024, Bac Ha Hydropower Plant was affected by storm No. 3 (YAGI) and encountered many difficulties in operating the electricity market according to Circular No. 21/2024/TT-BCT dated October 10, 2024 of the Ministry of Industry and Trade,... With many years of experience in operating the plant and timely instructions from the Executive Board, along with the efforts of all officers and employees, the Company has gradually overcome.

In 2024, the stable, flexible and safe operation of the plant helped the commercial electricity output reach 379.55 million kWh, an increase of 25.07% compared to the plan approved by the Company's 2024 Annual General Meeting of Shareholders, and brought about 2024 business results with after-tax profit reaching 163.04 billion VND.

 T.LAO

At the same time, creating a transparent, fair, and teamwork working environment has promoted solidarity and enthusiasm among employees, leading to increased productivity. In addition, by performing many non-outsourced work items by themselves to reduce costs, it helps improve business efficiency in 2024, including:

- Self-made sports area, step gate, beautifying the factory landscape, operating house,...

In addition, the Executive Board received valuable support from the Board of Directors and major shareholders in directing the resolution of problems to bring about specific production efficiency as follows:

- The Executive Board regularly organizes periodic maintenance inspections of the factory equipment system every week and month, promptly corrects equipment errors that occur during operation, ensuring stable and smooth operation of the machine;

- Prepares a budget for the list of equipment and materials for periodic maintenance in 2025, which has been reviewed and approved by the Board of Directors to allow the purchase of materials for maintenance in 2025;

- The Executive Board has worked with the National Power System Control Center to agree on the 2025 periodic maintenance and repair plan, reviewed materials and equipment, and purchased some necessary replacement consumables to promptly serve the maintenance work of the systems: Speed governor, excitation, turbine, generator, self-use system... to meet the approved downtime A0;

- The Executive Board closely follows the direction of the Board of Directors to operate the Bac Ha Hydropower Plant reservoir according to a flexible and reasonable plan, helping to save water but still meeting the maximum efficiency of the two generators and the commercial electricity output sent to the grid according to the dispatch order of the National Control Center (A0);

- The Executive Board conducts foreign affairs with the Company's partners such as the Electricity Trading Company, EVN, HDbank, Agribank... to speed up the payment of electricity bills, creating favorable conditions for balancing the Company's monthly and quarterly cash flow;

- The Executive Board coordinated with the consulting unit to prepare a report to the Ministry of Natural Resources and Environment. On December 6, 2024, the Company was granted a new Surface Water Exploitation License, facilitating the operation of the Bac Ha Hydropower Plant;

- The Executive Board coordinated with the consulting unit to prepare a dossier requesting an environmental license to the Ministry of Natural Resources and Environment. On January 24, 2025, the Company was granted an environmental license by the Ministry of Natural Resources and Environment.

In addition to the tasks performed, the Company's Executive Board also regularly pays attention to all aspects of work and management to improve professional and

technical expertise, participate in training courses on safety, fire prevention and fighting, and rescue.

III. Production and business plan for 2025

1. Electricity production and business plan

Based on the actual business operations and the analysis, forecasting and assessment of water flow to the lake in 2025, in addition to completing the periodic maintenance work in 2025 of the two generators, the Executive Board respectfully submits to the General Meeting of Shareholders for approval of the 2025 production and business plan as follows:

1	Basic construction investment	VND	19,660,000,000

2. Investment plan

2.1. Equipment part:

- Investment in procurement according to the 2024 plan and has been implemented according to the contract: Purchase of equipment to replace the excitation system of unit H1, with an amount of VND 9,098,375,000 to ensure the unit operates safely.

III. Evaluation of production and business performance results in 2024

From the actual business operations and the above analysis and assessment, the Executive Board found that the hydrological developments in the Chay River basin in the dry season came earlier than in previous years of operation, leading to a decrease in water flow to the reservoir in the last months of 2024 and extending to the first months of 2025. This negative development will greatly affect the production and business plan of BHHC, especially the financial sector will be seriously unbalanced.

The first and foremost solution is that the Executive Board continues to strictly control costs and optimally operate the reservoir to be able to produce the maximum amount of electricity corresponding to the water flow to the reservoir, prioritizing machine operation at times when the market price is high to maximize revenue.

In addition, the Board of Directors will strive to accelerate the short-term loan plan to offset and reduce production and business operating costs to help BHHC have enough resources to repay debts, avoid shortages and control the cash flow balance reasonably according to 2024 revenue to repay debts to banks, new investment costs and other costs, etc.

With the efforts made in 2024, along with the forecast of the hydrological situation in 2025, the Board of Directors will continue to overcome difficulties to complete the plan targets approved by the 2025 Annual General Meeting of Shareholders.

Respectfully submit to the General Meeting of Shareholders for consideration and approval of the full text of this report.

Sincerely thank you!

About Financial Management

However, the financial situation in 2024 still has many difficulties, specifically: long-term and short-term bank debt as of December 31, 2024 is 537.7 billion VND (of which long-term debt due and short-term debt is 179.9 billion VND and long-term debt is 357.7 billion VND) and debt to contractors is 1.33 billion VND. In 2024, the Board of Directors urged and directed the Executive Board to complete the procedures for borrowing additional working capital from HDbank - Lao Cai Branch with a limit of 30 billion VND to pay due tax and fee debts. Thereby, helping BHHC have more resources to pay dividends and repay principal and interest on payment terms of Agribank Thang Long Bank and VDB Bank - Lao Cai Branch. Thanks to the above timely payment, BHHC has not been classified as group V credit.

Company human resource organization

In 2024, the Board of Directors will continue to direct the Executive Board to restructure the Company's personnel to reduce costs, while increasing work efficiency, increasing concurrent positions, and consolidating positions related to safe and continuous operations to bring efficiency to the company.

General assessment

In the past year, in addition to the advantages, the Company also faced many difficulties. However, the Board of Directors has made appropriate, flexible and timely decisions and measures to help the Company's Executive Board proactively cope with specific weather and market fluctuations as follows:

Favorable

The Company always receives attention, support, and advice when necessary from partners (National Power System and Market Operation Company, Electricity Trading Company...), major shareholders (Bac Ha Investment Joint Stock Company, Licogi Corporation,...), local authorities in production management and factory operation coordination;

The members of the Board of Directors have contributed ideas and unanimously approved correct resolutions and decisions to promptly resolve the Company's monthly and quarterly arising issues;Đội ngũ CBCNV vận hành nhà máy có chuyên môn, kinh nghiệm và yêu nghề.

Hard

Bank loan interest rates are still high, increasing the Company's financial costs;

Administrative procedures related to the Company's production and business activities still have many shortcomings, causing waste of time and increasing the Company's management costs.

The impact of natural disasters increases the Company's costs.

Evaluation of the Board of Directors' performance in 2024

Advantage

The Board of Directors makes timely and accurate decisions and resolutions on the Company's monthly and quarterly business activities.

Limit

Because the Board of Directors members are not full-time and are from different agencies and locations, Board of Directors meetings sometimes do not have all members present.

Result

In 2024, thanks to the efforts of the Board of Directors, the Executive Board and all employees of the Company, the Company's revenue and profit in 2024 exceeded the plan set by the 2024 General Meeting of Shareholders, specifically as follows:

(Excerpt from Audited Financial Report 2024)

Unit: billion VND

Indicators	<i>Plan 2024</i>	<i>Implement ation in 2024</i>	<i>Implementat ion in 2023</i>

Revenue and electricity output over the years from 2012-2024

About electricity production and business

In the period of 2012-2024, under the supervision and direction of the Board of Directors through resolutions and decisions, the Company produced and transmitted to the national grid a commercial electricity output of 3,739.11 million kWh corresponding to the total revenue of the years from 2013-2024 reaching 3,618.20 billion VND and shown in the chart below:

* Note: Revenue in 2012 is carried forward to 2013.

About human resources

Streamlining and reducing the Company's apparatus, specifically reducing the staff from 83 people in 2018 to 62 people in 2019, to 54 people in 2020, to 50 people in 2021 and now to 48 people. The Company's organization and operations are gradually becoming more stable and professional.

Problems that need to be overcome

There should be specialized Board members to help the Board of Directors' activities be more closely linked and closely follow the Company's production and business activities.

**PART 2. PERFORMANCE EVALUATION OF THE EXECUTIVE BOARD AND
MANAGEMENT STAFF**

In general, the Board of Directors has performed its functions in accordance with the Company Charter. It operates production and business activities in accordance with the direction of the Board of Directors and the General Meeting of Shareholders. The interests of the Company, shareholders and employees are guaranteed. Specifically as follows:

- Directing the operation of machinery and equipment reasonably, operating the reservoir at a high water level to achieve maximum power generation efficiency and flexibility in operating the electricity market;

- The Board of Directors has applied KPI, 5S and applied information technology extensively in production to increase work efficiency;

- The Board of Directors always focuses on occupational safety and hygiene, fire prevention and fighting, periodic maintenance and repair of factory equipment to ensure safe operation;

- The management board utilizes unused surplus materials at the factory to decorate and beautify the factory landscape, plant flowers in vacant lots, construct the factory gate, factory sports area, etc. Thereby minimizing costs for the Company;

- The management has created a transparent, fair and teamwork working environment that has helped promote employee solidarity and enthusiasm for work, leading to increased productivity.

PART 3. 2025 PLAN

2025 target

The Company's consistent and arguably sole goal is to increase annual profits and increase the dividend payout ratio to shareholders. To do this, the Company must coordinate with the National Power System and Electricity Market Operation Company Limited (NSMO) to operate the maximum power generation capacity of the units and reduce costs, especially financial costs. In addition, efforts will be made to continue to seek financial solutions to minimize financial costs in order to bring about even greater efficiency in the coming fiscal years.

Plan for each area

- In 2025, the Board of Directors' activities will focus on the following contents:
- Electricity production and business
- It is predicted that in 2025, the general socio-economic situation of the whole country will have many positive changes. However, existing problems and difficulties such as bank debts and debts to construction contractors still exist and need to be overcome and resolved.
- From the above assessment, the Board of Directors sets out the general direction with the following goals:
- Continue to direct the Management Board to operate the reservoir optimally to achieve maximum electricity output and generation efficiency, bringing the highest economic efficiency for the 2025 fiscal year;
- Resolutely handle financial restructuring plans with the goal of having no overdue bank debt;
- Focus on researching and implementing new business plans that can generate additional revenue for the Company.

Investment and procurement work

In the current conditions, the Company's financial situation is still difficult. In the immediate future, in 2025, we will focus on investing in items related to the safe and continuous operation of the factory (maintenance and purchase of spare parts, materials, repair of VHI operating road after storm YAGI and housing for employees).

About management

Implement many measures to strengthen close supervision of production and business management, save reasonable costs, etc.;

Continue to research, seek solutions, and apply science and technology to minimize loss in power generation activities, and use water resources most effectively;

Deploy information technology in management and operation, improve professionalism and efficiency in production and business activities.

About human resources - labor

Regularly ensure that workers' lives are stable and improved, focusing on human resource planning, training and recruitment to promptly meet the Company's human resource needs. Increase concurrent positions to improve the Company's operational efficiency.

Some planning targets for 2025

The Board of Directors will direct and supervise the Executive Board and all employees of the Company to achieve some key targets for 2025 as follows:

(Excerpt from the 2025 production and business plan approved by the Company's Board of Directors for submission to the 2025 Annual General Meeting of Shareholders for approval)

NO	Target	Unit	Plan 2025
1.	Commercial electricity output	Million Kwh	309,79

PART 4. CONCLUSION AND RECOMMENDATIONS

Through the figures on the Company's financial situation in the fiscal years 2013-2024 and the forecast of financial figures for 2025, it can be seen that the Company's financial situation has improved significantly. However, the pressure to repay bank loans is still very large, especially the principal repayment period of Agribank on March 25 every year. On the other hand, due to the dry season in the first 6 months of the year, the water flow to the lake is low, leading to low revenue, not enough to repay the principal and interest of the banks. At the same time, due to the impact of the production and business results of Vietnam Electricity Group in 2023, there will be losses, affecting the monthly electricity payment of power plants in the country in general and Bac Ha Hydropower Plant in particular. Therefore, the monthly electricity payment to the Company's account will be delayed much longer than in previous years due to the reason of not being able to balance enough funds in time for payment. Due to the above difficulties, the Company's cash flow to repay debts to banks, contractors and production activities is facing many difficulties. Therefore, the Company continues to extend short-term working capital loans at HDBank Lao Cai branch and other partners to repay debts, avoiding the Company jumping into the bad debt group (group V - loss of capital).

The old debt of the contractors who built the factory with a value of about 1.33 billion VND and at the same time due to the impact of storm No. 3, the VH1 road into the factory was seriously eroded, making it impossible for vehicles to enter and exit the factory, so the company had to carry out construction with 19.7 billion VND and purchase excitation equipment approved by the 2024 Shareholders' Meeting with an amount of 9.1 billion VND. This is an urgent matter that needs to be resolved immediately in the first quarter and early second quarter of 2025.

The Board of Directors will resolutely direct and urge the Executive Board to seek additional sources of capital to help stabilize the company's financial situation in 2025 and the following years.

The Board of Directors will continue to direct, supervise, and accompany the Executive Board in all activities of the company to ensure the completion of the 2025* production and business plan and construction investment plan to be approved by the General Meeting of Shareholders.

Respectfully submit to the 2025 Annual General Meeting of Shareholders for consideration and approval.

Sincerely thank you!

INDEPENDENT AUDITORS' REPORT

To: The Shareholder, the Board of Directors and the Board of General Directors
of Bac Ha Hydropower Joint Stock Company

We have audited the accompanying financial statements of Bac Ha Hydropower Joint Stock Company ("the Company"), prepared on 28 February 2025 as set out from page 6 to page 26 which comprise the balance sheet as at 31 December 2024, and the statement of income, and statement of cash flows for the year ended 31 December 2024 and a summary of significant accounting policies and other explanatory information.

Responsibility of Board of General Directors

The Board of General Directors is responsible for the preparation and fair presentation of these financial statements in accordance with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to financial reporting and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Vietnamese Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Board of General Directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Auditor's opinion

In our opinion, the accompanying financial statements give a true and fair view of, in all material respects, the financial position of the Company as at 31 December 2024, and its financial performance and its cash flows for the year ended then in accordance with Vietnamese accounting standards, accounting regime and legal regulations relating to financial statement preparation and presentation.

INDEPENDENT AUDITORS' REPORT (CONTINUED)

Emphasis of Matter

We would like to draw the readers' attention to Note II in the Notes to the Company's Financial Statements. As of December 31, 2024, the Company's short-term liabilities exceeded its short-term assets by VND 39,712,947,785 (compared to VND 60,713,605,054 as of January 1, 2024). The Company's ability to continue as a going concern will depend on the implementation of its business plan and financial support from credit institutions. These conditions, along with other issues as outlined in Note II, indicate the presence of significant uncertainties that may cast doubt on the Company's ability to continue as a going concern.

Our opinion is not modified in respect of this matter.

NOTES TO THE FINANCIAL STATEMENTS

These notes are an integral part of and should be read in conjunction with the accompanying financial statements

I. GENERAL INFORMATION**1. Structure of ownership**

Bac Ha Hydropower Joint Stock Company ("the Company") was established and operates in accordance with Business Registration Certificate No.5300240587 first issued by Lao Cai Provincial Planning and Investment on February 18, 2008.

According to the company's business registration certificate, the 8th change on August 20, 2019, the Company's charter capital is 660,000,000,000 VND (six hundred and sixty billion VND), equivalent to 66,000,000 shares, par value is 10,000 VND/share.

2. Business field

The Company field of business is industrial production.

3. Operating industry

The Company's main business activities include: electricity production, transmission and distribution.

4. Normal production and business cycle

The Company's normal production and business cycle is carried out for a time period of 12 months.

5. Notes on comparability of information in financial statements

The comparative figures are those of the audited financial statements for the year ended 31 December 2023.

6. Employees

The total number of employees of the Company as at 31 December 2024 was 48 people (as at 01 January 2024 was 48 people).

II. ACCOUNTING CONVENTION AND ACCOUNTING FINANCIAL YEAR**Accounting convention**

The accompanying financial statements, expressed in Vietnam Dong (VND), are prepared under the historical cost convention and in accordance with Vietnamese accounting standards, accounting regime and legal regulations relating to financial statement preparation and presentation.

The accompanying financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries and jurisdictions other than Vietnam.

The assumption regarding the going concern basis

As at December 31, 2024, the Company's short-term liabilities exceeded its short-term assets by VND 39,712,947,785 (compared to VND 60,713,605,054 as at January 1, 2024). The company's ability to continue as a going concern over the next 12 months will depend on its ability to secure funds from credit institutions, incoming revenue, and other sources to meet debt obligations as they come due (if necessary) and to maintain the working capital needed for continued operations in the near future. The Management board has consistently evaluated and implemented measures to maximize the company's ability to continue as a going concern. The strategies currently in place include:

- The Bac Ha Hydropower Plant, which is operating steadily, will continue to generate significant revenue for the company in the coming years.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

These notes are an integral part of and should be read in conjunction with the accompanying financial statements

II. ACCOUNTING CONVENTION AND ACCOUNTING FINANCIAL YEAR (CONTINUED)**The assumption regarding the going concern basis (Continued)**

- The company will continue to receive credit provisions from Ho Chi Minh City Development Commercial Joint Stock Bank - Lao Cai Branch to ensure sufficient capital for its production and business operations and to pay off debts as they become due.

The Board of General Directors has carefully assessed the business plan, cash flow plan, and the ability to balance funds for paying debts and fulfilling financial obligations as they mature. The Board of General Directors is confident that preparing the accompanying financial statements on a going concern basis is appropriate.

Accounting financial year

The Company's financial year begins on 01 January and ends on 31 December.

III. ACCOUNTING STANDARDS AND SYSTEM APPLIED

The Company applies Vietnamese Accounting Standards and the Accounting regime for enterprises promulgated under the Circular No. 200/2014/TT-BTC dated 22 December 2014 by Ministry of Finance guiding the accounting regime for enterprises and Circular No. 53/2016/TT-BTC dated 21 March 2016 by Ministry of Finance amending and supplementing some articles of Circular No. 200/2014/TT-BTC.

IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies, which have been adopted by the Company in the preparation of these financial statements, are as follows:

Estimate

The preparation of financial statements in conformity with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to financial reporting requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the financial year. Although these accounting estimates are based on the management's best knowledge, actual results may differ from those estimates.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and short-term, highly liquid investments with original maturity of less than 3 months that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

Financial investments**Held-to-maturity investments**

Held-to-maturity investments comprise investments that the Company has the positive intent or ability to hold to maturity, including term deposits (commercial bills), bonds, preference shares which the issuer shall redeem at a certain date in the future, loans held to maturity to earn periodic interest and other held-to-maturity investments.

Held-to-maturity investments are recognised on a trade date basis and are initially measured at acquisition price plus directly attributable transaction costs. Post-acquisition interest income from held-to-maturity investments is recognised in the income statement on accrual basis. Pre-acquisition interest is deducted from the cost of such investments at the acquisition date.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)*These notes are an integral part of and should be read in conjunction with the accompanying financial statements***IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)*****Held-to-maturity investments (Continued)***

When there is strong evidence that part or all of the investment may not be recovered and the amount of loss can be reliably determined, the loss is recorded in financial expenses in the year and the investment value is directly deducted.

Held-to-maturity investments are measured at cost less provision for doubtful debts.

Provision for doubtful debts relating to held-to-maturity investments is made in accordance with prevailing accounting regulations.

Trade receivables

Receivables represent the amounts recoverable from customers or other debtors and are stated at book value less provision for doubtful debts.

Provision for doubtful debts represents the value of receivables that the Company does not expect to be able to collect at the end of the accounting period. Increases or decreases to the allowance account balance are recorded as administrative expenses in the Income Statement.

Tangible fixed assets and depreciation

Tangible fixed assets are stated at historical cost less accumulated depreciation.

The historical cost of purchased tangible fixed assets comprises its purchase price and any directly attributable costs of bringing the assets to its working condition and location for its intended use.

The costs of self-constructed or manufactured assets are the actual construction or manufacturing cost plus installation and test running costs.

Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives as follows:

<u>Fixed asset type</u>	<u>Years</u>
Buildings and structures	14 - 45
Machinery and equipment	04 - 16
Means of transport, transmission	07 - 12

Lease assets

A lease is classified as an operating lease when the lessor retains a significant portion of the rewards and assumes the risks of ownership of the asset. Operating lease expense is recognized in the income statement on a straight-line basis over the lease term. Consideration received or receivable as an incentive to enter into an operating lease is also recognized on a straight-line basis over the lease term.

Prepayments

Prepayments are expenses which have already been paid but relate to results of operations of multiple accounting periods.

Prepaid expenses include tools and supplies which are assets held by the Company for use in the normal course of business, with the original cost of each asset being less than VND 30 million and therefore not eligible for recognition as fixed assets under current regulations. The original cost of tools and supplies is depreciated using the straight-line method over a period of 01 to 03 years.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

These notes are an integral part of and should be read in conjunction with the accompanying financial statements

IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Revenue recognition

Revenue from providing service is recognized when all five (5) of the following conditions are satisfied:

- (a) The Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- (b) The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- (c) The amount of revenue can be measured reliably; When the contract stipulates that the buyer is entitled to return the purchased service under specific conditions, Revenue is recognized only when those specific conditions no longer exist and the buyer is not entitled to return the service rendered (unless the customer has the right to return the goods in the form of exchange for other goods or services);
- (d) It is probable that the economic benefits associated with the transaction will flow to the Company; and;
- (e) The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Interest is recognized on an accrual basis, based on the outstanding balance and applicable interest rate.

Interest from investments is recognized when the Company is entitled to receive the interest..

Borrowing costs

The cost of borrowing includes interest expenses and other directly related costs incurred in connection with loans.

Borrowing costs are recognized as expenses when incurred. However, in cases where borrowing costs are directly attributable to the construction or production of qualifying assets requiring a substantial period (over 12 months) to be ready for their intended use or sale, these borrowing costs are capitalized. For loans specifically used to finance the construction of fixed assets or investment properties, interest expenses are capitalized even if the construction period is less than 12 months. Any income earned from temporary investment of these borrowed funds is deducted from the related asset's carrying amount

For general borrowings where funds are used for the construction or production of qualifying assets, the capitalization of borrowing costs is determined based on the weighted average of accumulated costs incurred for the basic construction or production of those assets. The capitalization rate is calculated using the weighted average interest rate of outstanding borrowings during the year, excluding loans specifically used to form a specific asset.

Taxation

Corporate income tax represents the total amount of current payable taxes and deferred taxes.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit before tax as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years (including loss carried forward, if any) and it further excludes items that are never taxable or deductible.

Deferred tax is recognised on significant differences between carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit and is accounted for using balance sheet liability method. Deferred tax liabilities are generally recognised for all temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which deductible temporary differences can be utilised

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

These notes are an integral part of and should be read in conjunction with the accompanying financial statements

IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**Taxation (Continued)**

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset realised. Deferred tax is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same tax authority and the Company intends to settle its current tax assets and liabilities on a net basis.

The determination of the tax currently payable is based on the current interpretation of tax regulations. However, these regulations are subject to periodic variation and their ultimate determination depends on the results of the tax authorities' examinations.

Other taxes are paid in accordance with the prevailing tax laws in Vietnam.

Tax incentives: According to the current Law on Corporate Income Tax, the Company establishing an investment project in an area with particularly difficult economic conditions is entitled to a 10% corporate income tax incentive for 15 years: from 2012 to the end of 2026; is exempted from corporate income tax payable for 04 years from 2012 to the end of 2015; and is entitled to a 50% reduction in corporate income tax payable for 09 years from 2016 to 2024.

The year 2024 will be the thirteenth year the Company applies a corporate income tax rate of 10% on taxable income generated from the investment project.

Earning per share

Basic earnings per share is calculated by dividing the profit or loss after tax distributed to shareholders owning ordinary shares of the Company (after adjusting for the appropriation of bonus and welfare funds) by weighted average number of common shares outstanding during the year.

Diluted earnings per share is calculated by dividing the after – tax profit (or loss) to holders of the Company's common shares (after adjusting for dividends on convertible preferred shares change for the weighted average number of ordinary shares outstanding for the year and the weighted average number of ordinary shares to be issued in the event that all potential shares of common stock have an impairments are converted into common shares.

Related parties

Related parties are enterprises - including parent companies, subsidiaries, associates - individuals, that directly, or indirectly through one or more intermediaries, control, or are controlled by, or are under common control. Associates; individuals owning, directly or indirectly in the voting power of the Company that gives them significant influence over the Company, key management personnel such as directors and officers of the Companies; close members of the family of any such individual and associate are also considered as related party.

In considering each possible related party relationship, attention is directed to the substance of the relationship, and not merely the legal form.

REPORT ON THE SUPERVISORY BOARD'S ACTIVITIES

At the 2025 Annual General Meeting of Shareholders

To: General Meeting of Shareholders of Bac Ha Hydropower Joint Stock Company

- Pursuant to the Law on Enterprises No. 59/2020/QH14 dated June 17, 2020;
- Pursuant to the Charter on organization and operation of Bac Ha Hydropower Joint Stock Company;
- Pursuant to the results of inspection and supervision activities of the Board of Supervisors in 2024,

The Board of Supervisors reports on the inspection and supervision of business activities of Bac Ha Hydropower Joint Stock Company (BHHC) in 2024 to the Annual General Meeting of Shareholders of Bac Ha Hydropower Joint Stock Company with the following contents:

I. Situation of inspection and supervision of BHHC's business activities in 2024

1. Business performance results in 2024

In 2024, due to the high average water flow to the lake compared to the years of operation, the electricity output reached 379.55 million kWh, equal to 125.93% compared to 2023 and 125.08% compared to the annual plan;

The Board of Directors and the Executive Board have tried to save maximum costs to ensure benefits for shareholders on the basis of stable plant operation and flexible bidding in electricity market operation. Thereby, BHHC's revenue from selling electricity to the plant in 2024 reached 364.12 billion VND, an increase of 56.35 billion VND, equivalent to 18.31% compared to 2023;

Flood and storm prevention, fire and explosion prevention, hygiene and safety, and factory maintenance are well done. In 2024, the factory will operate safely and effectively;

The operation and regulation of the reservoir will be ensured in accordance with the reservoir operation process approved by the Ministry of Industry and Trade and the People's Committee of Lao Cai province;

The organization of human resources will gradually stabilize after reviewing and cutting redundant departments.

2. The Company's financial situation in 2024

The 2024 financial statements of Bac Ha Hydropower Joint Stock Company have been audited by International Auditing Company Limited (iCPA). According to

the Board of Supervisors, the reported figures have honestly and reasonably reflected in all important aspects the financial situation, cash flow and business performance of the company according to Vietnamese accounting and auditing standards.

(Financial report is attached)

Overview of the Company's financial picture in 2024, the Board of Supervisors assessed that the key point is that the Company's cash flow is still seriously unbalanced, while debt is still high, specifically: debt to banks is 537.7 billion VND (as of December 31, 2024).

II. Board of Supervisors' activities in 2024

1. Personnel and activities of the Board of Supervisors

The Board of Supervisors for the 2021-2026 term consists of 03 members:

- Mr. Pham Ngoc Tan (Head of the Board)
- Mr. Nguyen Anh Dung (Member)
- Mr. Do Van Chinh (Member)

Regular activities of the Board of Supervisors: The Board of Supervisors has conducted inspection and supervision activities to ensure compliance with the provisions of the Enterprise Law, the Accounting Law, the Charter of the organization and operation of Bac Ha Hydropower Joint Stock Company, the Resolutions and Decisions of the General Meeting of Shareholders/Board of Directors in the management and operation of the Company's production and business activities, specifically:

a. Auditing financial reports and supervising information disclosure

Check and supervise the Company's accounting work to ensure compliance with the corporate accounting regime and Vietnamese accounting standards;

Review quarterly and annual financial reports provided by the Board of Directors. From there, examine the accounting of revenue, cost allocation, analyze and evaluate the financial situation, business activities, debt management situation and the situation of setting up provisions according to regulations;

The Board of Supervisors has coordinated with the Board of Directors to propose the selection of an independent auditing company to audit the annual financial statements;

Participate in coordinating with the auditing unit on the scope and content of the annual financial statement audit. Appraise the financial statements before and after the audit, and consider the opinions of the independent auditor.

b. Coordinate and supervise the activities of the Board of Directors and Executive Board.

The Board of Directors and the Executive Board have held many meetings, thereby issuing Resolutions and Decisions to promptly direct the Company's business activities;

The Supervisory Board has attended quarterly meetings between the Board of Directors and the Executive Board to listen to the Executive Board's reports on the

business situation of each quarter and the goals and directions for the next activities in order to successfully complete the set plan targets;

In 2024, the Company did not have any conflicts of interest with related parties.

2. Evaluation of the Board of Directors' performance in 2024

In the past year, the activities of the Board of Directors have closely followed the Resolutions of the General Meeting of Shareholders, met the Company's operational requirements and were in accordance with the provisions of law.

a. Some typical tasks that the Board of Directors and Executive Board have carried out according to the Resolution of the General Meeting of Shareholders in 2024:

- Directing the optimal operation of reservoirs and machinery and equipment, working with the National Electricity System and Market Operation Company (NSMO) to operate effectively in the electricity market.
- Working well with NSMO and the Electricity Trading Company, ensuring maximum commercial electricity output to the grid and shortening payment processing time.
- Maximizing savings on factory operating costs, streamlining the Company's apparatus while still ensuring the factory operates stably and safely, meeting maximum commercial electricity output to the grid.
- Working with banks and credit institutions to adjust and reduce the company's loan interest rates. Participate in finding other sources of credit capital.
- Apply KPI, 5S and technology extensively to the factory's production activities... to improve the efficiency of the company's production activities.
- Beautify the Company's landscape, plant flowers on the way to the factory and vacant land and the operator's area,...
- In addition, the Company always pays attention to implementing well the regimes and policies for employees according to the provisions of the Labor Code and current regimes and policies of the State.

b. Some financial indicators implemented in the period 2013 - 2024

Unit: million VND	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024

**REGULATIONS
ORGANIZING THE 2025 ANNUAL GENERAL MEETING OF
SHAREHOLDERS
BAC HA HYDROELECTRICITY JOINT STOCK COMPANY**

Pursuant to the Law on Enterprises No. 59/2020/QH14 dated June 17, 2020;

Pursuant to the Charter on organization and operation of Bac Ha Hydropower Joint Stock Company approved by the founding General Meeting of Shareholders on January 28, 2008 and the 5th amended Charter approved by the General Meeting of Shareholders on May 30, 2022;

Pursuant to Resolution No. 29/2025/NQ-BHHC-HĐQT dated January 17, 2025 of the Company's Board of Directors on convening the 2025 Annual General Meeting of Shareholders,

The Organizing Committee of the 2025 Annual General Meeting of Shareholders of Bac Ha Hydropower Joint Stock Company promulgates the Regulations on organizing the 2025 Annual General Meeting of Shareholders as follows:

**Chapter I
GENERAL PROVISIONS**

Article 1. Subjects and scope of application

1.1. These regulations stipulate the format for organizing the 2025 Annual General Meeting of Shareholders of Bac Ha Hydropower Joint Stock Company and the rights and obligations of shareholders attending the meeting.

1.2. The Company's shareholders and meeting attendees are responsible for complying with the provisions of this Charter.

Article 2. Rights of shareholders when attending the meeting

2.1. To directly attend or authorize a representative to attend the Congress and to express opinions and vote on issues listed in the Congress agenda.

2.2. The Organizing Committee will send a meeting invitation along with the conference regulations and conference agenda for study and discussion before the conference.

2.3. Voting cards are issued with the number of votes corresponding to the number of voting shares that the shareholder registers to own or represent (for example, the voting card of a shareholder delegate is recorded as 10,000 shares, meaning that shareholder has 10,000 votes).

2.4. Shareholders who arrive late to the meeting have the right to register to attend immediately and then have the right to participate and vote immediately at the meeting; but do not have the right to participate and vote on the contents previously approved by the meeting when the shareholder is not present (the validity of the votes that have been conducted will not be affected).

Article 3. Obligations of shareholders when attending the meeting

3.1. Comply with the provisions of this Regulation.

3.2. Respect the executive authority of the Chairman of the meeting and respect the voting results of the meeting conducted in a valid manner.

3.3. Pay for your own travel and accommodation to attend the conference.

3.4. Bring the meeting invitation along with the authorization letter (in case of authorization) and identification documents (CCCD card or passport), present to the shareholder qualification verification committee before the official meeting begins.

Article 4. Rights and obligations of the Shareholder Qualification Inspection Board
